

JESSICA NUÑEZ MOLINA

San Carlos, Uruguay · [linkedin/in/jess](#) · [github.com](#) · +59899285080 · jess.nunez.1106@gmail.com

With a young and solid career, I define myself as a responsible and committed professional, with strong organizational skills and proactivity. Adaptability, communication, and results- oriented qualities are characteristics that define my profile. I am currently looking for job opportunities in software development, with a focus on creating web projects, diverse applications, and project management. My problem-solving ability and attention to detail allow me to deliver high-quality work, aiming to add value and promote positive work environments.

EXPERIENCE

Self-Employed

Developer & Project Manager

San Carlos, Uruguay

May 2023–Current

- Collaborate with a cross-functional team to design and develop innovative projects, ensuring alignment with creative objectives and achieving a **100%** on-time delivery rate.
- On a daily basis, I lead task management for each team member using the Scrum methodology, which optimizes our meetings and syncs for efficient and productive management.
- Document all project aspects, including tech stack details and onboarding procedures, ensuring seamless integration for new team members.
- I ensure the successful delivery of projects by monitoring progress, addressing challenges, and maintaining clear communication with stakeholders.

ForEach

Full Stack Developer & Project Manager

Chile

December 2024–May 2025

- Developed full stack web applications from conceptualization to implementation using modern frontend and backend technologies.
- Led multidisciplinary teams to achieve strategic objectives and deliver projects within established deadlines.
- Implemented agile methodologies and optimized development processes that improved team efficiency.
- Managed complete software development lifecycle including planning, design, development, testing, and deployment.
- Coordinated communication between technical and business stakeholders to align project requirements and expectations.
- Maintained high quality standards across all deliverables through code reviews, automated testing, and technical documentation.
- Optimized web application architectures to improve performance, scalability, and user experience.

The Sandbox
FullStack Developer

Punta del Este, Uruguay
May 2021–April 2023

- Contributed to creating and implementing new practices during team meetings.
- Proposed and presented innovative ideas to enhance team performance and optimize processes.
- Participated in meetings with international clients, facilitating solutions and addressing project requirements effectively.
- Identified and resolved workflow issues through collaboration with the team, improving overall productivity.
- Achieved all short- and long-term goals consistently, demonstrating adaptability and a strong willingness to learn and support team members.

Departmental Government of Maldonado
Administrative Intern

San Carlos, Uruguay
July 2014–December 2016

- Personalized assistance at the Tax Office, both in person and over the phone.
- Various administrative tasks and file management.
